

Protecting Lone Workers

Ensuring the safety of employees that work alone is every employer's responsibility, and SkyTrack allows you to manage your Duty of Care with ease. The new XT403 duress device gives employers peace of mind by being able to automate scheduled staff wellbeing checks using Telstra 4G network coverage, with GPS & WiFi positioning modes, which means no more making calls or sending texts to check on the well-being of staff onsite or needing to ensure someone stands by in case the lone worker requires assistance.

Penalties for Corporations failing to comply with health and safety duties in the Work Health and Safety Act are upwards of \$250,000.

Industries

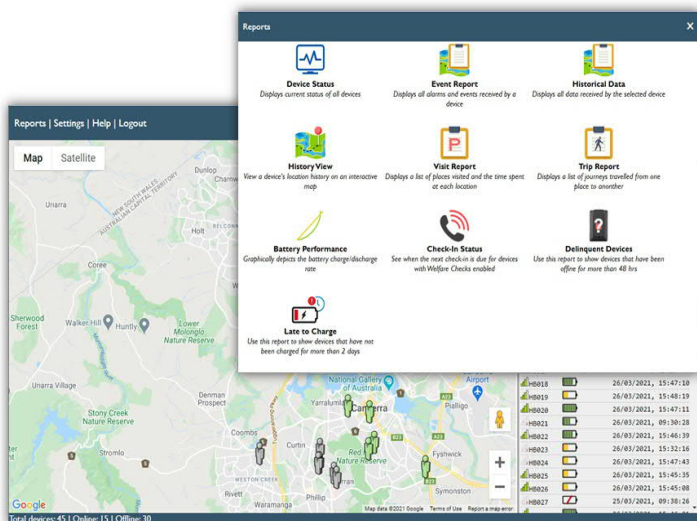

Industries that can benefit from SkyTrack include:

- Health care
- Supported Accommodation
- Manufacturing
- Construction
- Security
- Education
- Local Government
- Victims of crime
- Patient and aged care
- Real estate

Online Reporting Platform

The cloud hosted online reporting platform allows you to:

- Know where staff are in real time
- Logins by department
- Management reports
- Hosted in Australia in Microsoft's Cloud

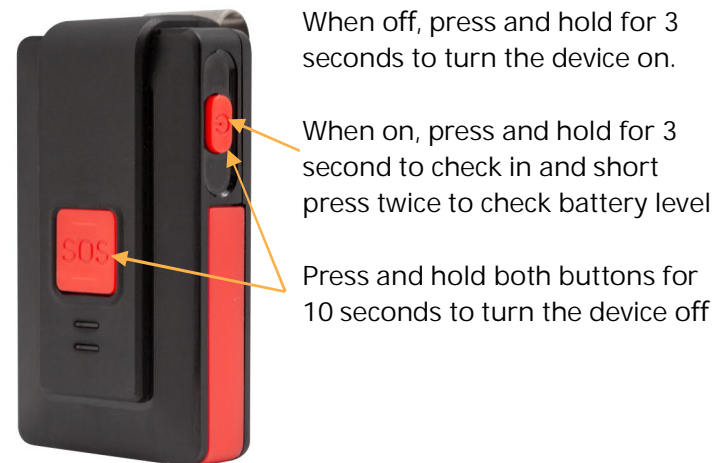

Configurable Alarms

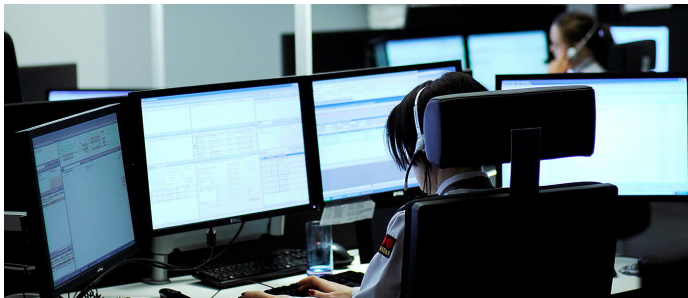

All alarms can be handled by the Control Room, sent via Email/SMS to designated recipients and are logged to the online platform

- SOS/Duress
- Fail to check-in (Automated welfare checks)
- Person down/Fall
- Motionless
- Enter/Exit defined location
- Low battery
- Speeding
- Turned off
