

Home Automation
**A CONVENIENCE
FOR SOME
BUT A NECESSITY
FOR OTHERS!**

“Infinite Automation”
Intelligent Automation at an
Affordable Price!

About Us :

Infinite Automation is an Australia automation company developing and producing world-class technology and premium quality products for domestic and export markets. Our products are proudly designed, developed and made in Australia.

With a primary focus on safety, we are committed to high quality, reliable automation solutions at an affordable price. When retrofit or newly installed our systems can automate any electrical or electromechanical device from anywhere in the world using a simple smart phone or tablet. Our systems are designed for new or retrofit installation with little to no hard wiring required, eliminating unnecessary modification and dramatically reducing installation time and cost.

We offer a comprehensive range of products to suit all residential, commercial and industrial applications. Our ongoing R&D, automated system enhancements and feature drops ensure the system is continuously improved and future-proofed via OTA (over the air) software updates.

Our devices are designed to transform existing switches and GPO's (General Power Outlet's) with enhanced usability via programmable, intuitive remote control. Entire systems and circuits may be operated or disabled at the single touch of a smart phone or tablet.

Infinite Automation's proprietary application also provides appliance automation features, detailed power consumption, usage data, and is AI enabled for future analysis to limit energy wastage.

ACCESS
AND SAFETY

- ✓ **Safety**
- ✓ **Privacy**
- ✓ **Convenience**
- ✓ **Dignity**
- ✓ **Prosperity**

Simple

Anyone who can operate a smart phone can operate our application.

Reliable

Quality Australian made product manufactured to comply with Australia's high electrical standards and exported to the US and India. Infinite Automation provides an industry leading three-year replacement guarantee on all our products.

Affordable

Infinite Automation believes that the benefits of modern automation systems should be available to all. As such, we have intentionally designed affordability and ease of retrofit into our products, whilst removing complexity wherever possible.

Automate :

Lights

Never worry again about leaving lights on and wasting money on energy bills again. Turn lights ON and OFF from anywhere with your smartphone.

Blinds

Operate your blinds from the comfort of your armchair, no more glaring sun in your eyes as the day draws to a close. Program them to open in the morning and close in the afternoon to suit your preferences.

Heating & Cooling

No more returning to a 'hothouse' or a 'cold-house' as you can turn on the heating and/or cooling on the way home or program to suit preferences and seasonal requirements.

Doors

Make access a breeze with doors that open as you approach and close behind you effortlessly.

Gates

Gates, Garage Doors and Rollers can all be operated from your phone or programmed to recognise you and operate automatically. Allow visitors to enter without needing to be met.

Locks

Lock and unlock one, or several doors at the touch of your phone screen. Open the front door for any visitors without moving from your current position.
